The Great War was a pivotal experience for twentieth-century Canada. Shoestring Soldiers is the first scholarly study since 1938 to focus exclusively on Canada's initial overseas experience from late 1914 to the end of 1915. In this exciting new work, Andrew Iarocci challenges the dominant view that the 1st Canadian Division was poorly prepared for war in 1914, and less than effective during battles in 1915. He examines the first generations of men to serve overseas with the division: their training, leadership, morale, and combat operations from Salisbury Plain to the Ypres Salient, from the La Bassée Canal to Ploegsteert Wood. Iarocci contends that setbacks and high losses in battle were not so much the products of poor training and weak leadership as they were of inadequate material resources on the Western Front. Shoestring Soldiers incorporates a wealth of research material from official documents, soldiers' letters and diaries, and the battlefields themselves, surveyed

America's 754 million acres of forest constitute more than a major geographical feature. They are intricately woven into the national economy and

culture-providing a fifth of the nation's industrial raw material, protecting and regulating its watersheds, providing grazing range for a sizeable portion of livestock, producing most of its game and much of its nonsport wildlife, and attracting millions of tourists annually. The Southern Forest: Geography, Ecology, and Silviculture examines in-depth the forests of the South, providing a comprehensive description of the region from which most of the nation's wood for housing and paper will be grown and harvested in the future. Closing the old-growth forests of the Northwest and reduction of harvests in the tropics necessitate the U.S. South intensifying tree growth to accommodate society's requirements. This book provides the information for practicing foresters, researchers, and students to increase forest growth dramatically for the many forest types and in the various subregions without detrimentally affecting soil, species diversity, or long-term aesthetics. The four factors of site-edaphic, biotic, climatic, and physiographic-are given special attention. Over 200 photographs; an extensive listing of literature citations; and appendixes of tree, insect, and disease agents are included. With files of field notes and photographs, Walker and Oswald revisit-and take the reader along to grasp-the South's rich forests. A land manager will need no other reference to the soils, biotic components, climate or physiology of the region.

introduction to the wildflowers and plant communities of the southern Appalachians and the rolling hills of the adjoining piedmont. Rather than organizing plants, including trees, shrubs, and herbaceous plants, by flower color or family characteristics, as is done in most guidebooks, botanist Tim Spira takes a holistic, ecological approach that enables the reader to identify and learn about plants in their natural communities. This approach, says Spira, better reflects the natural world, as plants, like other organisms, don't live in isolation; they coexist and interact in myriad ways. Full-color photo keys allow the reader to rapidly preview plants found within each of the 21 major plant communities described, and the illustrated species description for each of the 340 featured plants includes fascinating information about the ecology and natural history of each plant in its larger environment. With this new format, readers can see how the mountain and piedmont landscapes form a mosaic of plant communities that harbor particular groups of plants. The volume also includes a glossary, illustrations of plant structures, and descriptions of sites to visit. Whether you're a beginning naturalist or an expert botanist, this guidebook is a useful companion on field excursions and wildflower walks, as well as a valuable reference. "Don't know how its possible but this series just keeps getting better! And I guess I shouldn't say better because I fall in love with every single character, so better wouldn't be the right word!" "I love how the characters from the previous books make appearances in each of the newer books keeping you updated with the happenings surrounding them and weaving their stories into the current main characters." "This book is deep and heartwarming. It is my favorite book so far [in the series] and also the most sincere and heartbreaking." These stories are so different from most of the other romance books I read. The characters always pull me in. I got this book yesterday and couldn't put it down until I was done reading it. Series Rebellious against a life of black and white, Miranda Ryan paints the world in a technicolor fever. She spends her free time on park benches, analyzing people from the outside in and creating whimsical stories about their lives. Unbridled and full of life, her ever-changing heart is a revolving door no man can figure out. And she likes it that way. But when Derek Rhodes enters her life, he stubbornly challenges her every move. As she unsuccessfully avoids this opinionated prankster her colors fade to gray and she is forced into a choice . . . to lose the self she knows or the self she has never been. Derek Rhodes wears the same shade of brown every day and avoids eye contact with strangers, until Miranda walks into his life and splashes his world with streaks of colors he swore he'd never touch. Drawn to her imaginative personality, he finds himself questioning his own cynical nature and flat-lined ideals, only to fall in love and realize the only woman he's ever let into his heart has no plans of letting a man into hers. Follow them both as they poke and prod and test each others limits on a journey of discovery.

Steve Andrews had it made, a successful law practice in Miami, a young, beautiful wife and a sailboat to enjoy his leisure time. Then one day he woke up to find his world turned upside down. His law practice was failing and he was informed his wife was not legally his wife. To make matters worse, his wife had emptied all of his escrow and trust accounts, turned the money over to her real husband who had exchanged the funds for gold, and the authorities wanted to talk with him. In a desperate attempt to recover some money, Steve contracted to sell his sailboat to a buyer in Key West. The adventure begins when Steve decides to deliver the boat to Key West by sailing down the Intercoastal Waterway, passing through the protected area known as the backcountry on the Gulf side of the Florida Keys. Beginning his journey, Steve meets Shoestring, a common
