The American West

The three waves of feminism are explored through the lives of the women who made history in bringing women's issues to the forefront of American society. Many early feminists supported not only women's rights, but also rights of slaves and contributed to the passing of the Thirteenth Amendment, granting emancipation to slaves. They continued to work towards women's suffrage and were hopeful the Fourteenth Amendment would provide universal suffrage. However, women were not granted suffrage until the passing of the Nineteenth Amendment, nearly fifty years later. It was women's fundamental need for independence and an identity of their own, separate from that of men, which thrust the women's movement forward and continues to propel it today. Many notable women, such as Susan B. Anthony, Elizabeth Cady Stanton, Billie Jean King, Betty Friedan, Helen Gurley Brown, Jane Fonda, and Sandra Day O'Connor, are included in this history of the women's movement in America. The biographical entries cite works for further reading, and the volume closes with a bibliography. The Shapers of the Great Debate series takes a biographical approach to history, following the premise that people make history in the circumstances in which they find themselves. Each volume in this series examines the lives and experiences of the individuals involved in a particular debate through both major and minor biographies.

The Pathfinder, a Journal of Independent Religious Reform

For much of Christian history, the role of women in the life of the church both local and universal has been downplayed, overlooked, or simply denied. Such a state of affairs of course also denies the testimony of the church's Scriptures regarding the key role women played in Jesus' own ministry and that of the early church. It denies or deliberately overlooks the significant role of women in the life of the church throughout the church's history, down to and including the present day. In recent years such denial of the significant place of women in Christian history of course has been addressed. But nowhere is there available a more comprehensive bibliography than the present one compiled by Carolyn Blevins. The reach of Blevins's bibliography is wide, from the earliest church to present times, across every ethnic and national boundary, and throughout virtually every segment of the church, Catholic and Protestant and stripes in between or beyond. This is in many ways but a beginning place. Yet with the help of Blevins's good work, students, teachers, researchers, historians, and all other seekers after the significant place of women in Christian history, have indeed a place to make a good beginning.

Speeches of the Right Hon. W.E. Gladstone, M.P.

The American West in history and for historians is a contested place. At one time, Frederick Jackson Turner's frontier thesis was the center of historical explanation of all of American history. For the present generation of American historians, the American West is a contested place where arguments about place, process, multi-culturalism, gender, environment, urbanization, and law focus popular and professional attention. This collection of published articles provides readers with both the traditional interpretations of the West and the "New West" view of the significance of place for people and events. The editors heavily emphasize gender and law in the analysis of each of the volumes. The volumes in this set are also available individually. Volume 1. Where is the West? (0-813-3456-7) Volume 2. Racial Encounters in the Multi-cultured West (0-8153-3457-5) Volume 3. The Gendered West (0-8153-3458-3) Volume 4. Environmental Problems in America's Garden of Eden (0-8153-3458-3) Volume 5. Four generations of women fought for the right to vote. This book shows how their grand reform effort overcame resistance from traditionalists fearing social decay, religious leaders citing scriptural prohibitions, and a stodgy political establishment reluctant to share power. • Shows how women's rights came about not only because suffragists organized—they had been organized for decades to no avail—but also because the concept of womanhood expanded to accommodate a role for women outside the home and church • Explains why suffrage came first and most easily in the West, which wanted to attract women settlers and valued their strength and independence, and most reluctantly in the South, where many feared that suffrage would undermine white supremacy • Provides a finely nuanced view of sexism within the abolitionist movement and racism within the women's movement • Addresses the challenges that early suffragists faced in getting women themselves to think that they deserved the vote
