august body. From the insightful introduction, prepared each year by a distinguished expert on UN affairs, to the full-text presentation of reports and resolutions and the helpful subject index, ARUNA provides a practical tour of each year's U.N. actions and debates. The expert selection of documents by Joachim Muller and Karl Sauvant and the topic-based organization of those documents make any researcher's task much easier than the vast searching, sorting, and pruning required by the U.N.'s website. The series' topic-based organization of the materials and subject index lend invaluable guidance to all researchers. ARUNA presents comprehensive documentation of the work of the UN on an annual basis, starting in September of each year with the beginning of the regular sessions of the General Assembly. Coverage of the UN's key organs is provided, including the General Assembly, the Security Council, the Economic and Social Council (ECOSOC), the International Court of Justice, and the UN Secretariat. In addition, selected reports of intergovernmental bodies and expert groups are included. Solely official UN documentation is used. ARUNA occupies a special place in the publications on the work of the UN, as it allows readers to obtain an overview of the principal developments in its key organs. This makes it an important reference source for policy-makers and academic researchers.

b. The 2009-2010 volumes
This year's edition continues to focus on the world financial crisis and the reaction of the United Nations and the international financial system to that crisis. The Overview to this year's edition, written by Joachim Muller and Karl Sauvant, examines the changing role of the United Nations and explores ways in which the management of the financial crisis has impacted that role. The Introduction to this year's edition also examines the effects of this crisis; this Introduction is drawn from the "Report of the Commission of Experts of the President of the United Nations General Assembly on Reforms of the International Monetary and Financial System," as well as a slightly edited version of a Preface to that report written by Professor Joseph E. Stiglitz. The Introduction discusses the findings of the Commission and proposes the creation of a new institution, a Global Economic Coordination Council, which would be supported by an International Panel of Experts with a geographically diverse membership that would represent the interests of emerging and developing countries as well as those of developed countries. Dr. Joseph E. Stiglitz, who served as Chairman of the Commission and wrote the Preface to the Commission's Report, holds joint professorships at Columbia University's Economics Department and its Business School. He is also Co-founder and Co-President of the Initiative for Policy Dialogue. From 1997 to 2000 he was the World Bank's Senior Vice President for Development Economics and Chief Economist. From 1995 to 1997 he served as Chairman of the U.S. Council of Economic Advisers and as a member of President Clinton's cabinet. From 1993 to 1995 he was a member of the Council of Economic Advisers. He was previously a professor of economics at Stanford, Princeton, Yale, and All Souls College. Dr. Stiglitz is also a leading scholar of the economics of the public sector and was awarded the Nobel Prize in Economics in 2001 in addition to the American Economic Association's biennial John Bates Clark Award in 1979. His recent publications include *Freefall: America, Free Markets, and the Sinking of the World Economy* (2010), *Making Globalization Work* (2006), *Fair Trade for All* (2005), and *Globalization and its Discontents* (2002). The 2009-2010 volumes of ARUNA therefore also devote considerable attention to the financial crisis as well as other international crises. Among the documents in the 2009-2010 volumes are the complete General Assembly resolutions, as well as the Report and Resolutions of

the Security Council and the Economic and Social Council (ECOSOC). Annual Reports of note include reports of the United Nations Children's Fund (UNICEF), the UN Development Programme and UN Population Fund, the UN High Commissioner for Human Rights, the UN High Commissioner for Refugees, the UN Relief and Works Agency for Palestine Refugees in the Near East, and the World Food Programme. Mr. Muller and Dr. Sauvart have also selected progress reports on key peacekeeping, peace-building, and political missions, including those for Afghanistan, the Democratic Republic of the Congo, Haiti, Iraq, the Middle East, Sudan, and West Africa. c. Volume V (this volume) This volume contains the following: Chapter 1: General Assembly, Sixty-fourth Session (continued) 3. Resolutions Adopted by the General Assembly at Its Sixty-fourth Session (continued) (Resolutions 64/104 through 64/199) d. Guest Authors of previous years' editions Each annual edition of ARUNA is introduced by a Guest Author, a distinguished expert on UN affairs, who highlights the outstanding themes of the year in review. Together with an overview provided by the editors, this introduction is intended to facilitate access to the material and, above all, to make it easier for users of ARUNA to "see the forest for the trees." This year's ARUNA includes excerpts from the "Report of the Commission of Experts of the President of the United Nations General Assembly on Reforms of the International Monetary and Financial System" (21 Sept. 2009), and from a slightly edited version of a Preface to that report written by Professor Joseph E. Stiglitz. However, the roster of distinguished experts who have contributed this introduction in the past is also worthy of mention: Jose Antonio Ocampo: ARUNA 2008/2009 edition Professor Jose Antonio Ocampo is Co-President of the Initiative for Policy Dialogue. He is also Professor in the School of International and Public Affairs and Fellow of the Committee on Global Thought at Columbia University. Professor Ocampo previously held the positions of Under-Secretary-General of the United Nations for Economic and Social Affairs, Executive Secretary of the United Nations Economic Commission for Latin America and the Caribbean, and Minister of Finance, Agriculture, and Planning of Colombia. In 2009, he was a member of the Commission of Experts of the President of the United Nations General Assembly on Reforms of the International Monetary and Financial System. Professor Ocampo is also the author of numerous books and articles on macroeconomics policy and theory, economic development, international trade, and economic history. His recent publications include *Stability with Growth: Macroeconomics, Liberalization and Development*, with Joseph E. Stiglitz, Shari Spiegel, Ricardo Ffrench-Davis and Deepak Nayyar (New York: Oxford University Press, 2006). Jeffrey D. Sachs: ARUNA 2007/2008 edition Professor Jeffrey D. Sachs is Director of the Earth Institute at Columbia University and Special Advisor to the Secretary-General of the UN on the Millennium Development Goals. Professor Sachs's introduction to ARUNA 2007/2008 was titled "Towards a New Global Protocol on Climate Change," in which he argued that solving the climate change problem will demand four steps: scientific consensus, public awareness, the development of alternative technologies, and a global framework for action. He dealt, in particular, with the science underpinning the negotiations for a new global protocol on climate change, as a successor to the Kyoto Protocol. Professor Sachs argued that climate change crises can only be solved through the goals, leadership, and treaty mechanisms of the UN. Edward C. Luck: ARUNA 2006/2007 edition Professor Edward C. Luck is UN Special Advisor on the Responsibility to Protect and Vice President and Director of Studies at the International Peace Academy. From 1984 to 1994, he served as

President and Chief Executive Officer of the UN Association of the USA (UNA-USA). Professor Luck's introduction to ARUNA 2006/2007 covered "The responsible sovereign and the responsibility to protect," in which he addressed the scope and content of what was agreed at the 2005 World Summit, the implications of the responsibility to protect (RtoP) for notions of state sovereignty, and some of the conceptual, architectural, and policy challenges then facing UN Secretary-General Ban Ki-moon's commitment to "operationalizing" the responsibility to protect and translating it "from words to deeds." Louise Frechette: ARUNA 2005/2006 edition Ms Louise Frechette is Distinguished Fellow at the Centre for International Governance Innovation, Waterloo, Ontario. Until March 2006, she was the first Deputy Secretary-General of the UN; before that, she was Permanent Representative of Canada to the UN. Ms Frechette's introduction to ARUNA 2005/2006 covered "United Nations reform: an unfinished story." As the first Deputy Secretary-General of the UN, Ms Frechette was uniquely positioned to undertake a personal assessment of what has changed and what has not changed in the past decade at the UN and why. She examined if the UN is functioning better than it was 15 years ago, why reform is so difficult to achieve and what the future holds for the institutions. Rubens Ricupero: ARUNA 2004/2005 edition Mr Rubens Ricupero is Dean of the Fundacno Armando Alvares Penteado (FAAP), Sao Paulo and was formerly Secretary-General of UN Conference on Trade and Development (UNCTAD) and Minister of Finance of Brazil. Mr Ricupero's introduction to ARUNA 2004/2005 covered "The difficulty of building consensus in an age of extremes" and examined the mysteries of the negotiating process leading to the outcome of the 2005 World Summit. Rather than a "Grand Bargain" of a comprehensive UN reform in the areas of development, security and human rights, it is argued that the Summit ended more on a note of lamentation and regret over a missed opportunity. Mr Ricupero concludes that contrary to the daring proclamation at the outset by the Secretary-General, the conditions indispensable to succeed were not in place. Indeed, it was hard to imagine that an ambitious and balanced reform package for the UN could have had any real chance of succeeding.

Island Tourism and Sustainable Development

This is a study of resource sustainability and Caribbean development.

Integrating Sustainable Development Into National Frameworks

Building a Climate Resilient Economy and Society

About one fifth of all politically independent countries are small island developing states. For these countries, sustainable development is not a matter of choice, it is imperative. This book seeks to initiate a debate on how to support a new wave of action for sustainable development.

most significant maritime basins during an era of intense restructuring and globalization.

Report of the Global Conference on the Sustainable Development of Small Island Developing States

This book provides an overview of the most important issues as they are dealt with in the Johannesburg World Summit on Sustainable Development's Plan of Implementation. It addresses the science behind the discussions on poverty, production and consumption patterns, water, energy, Small Island Developing States, sustainability issues in Central/Eastern Europe and Latin America, and the role of the financial world in the sustainable development of education, science and research.

The World Summit on Sustainable Development

This book focuses on public policy issues in Caribbean, evaluating current policy and suggests realistic improvements and alternatives. It also focuses on following themes: economic policy, the regional business environment, regionalism and integration, health care, labor and migration and gender.

Sustainable Development in Small Island Developing States

Debt and Development in Small Island Developing States draws on the expertise of established researchers and public officials from within the SIDS community to answer the following pressing questions related to sustainability, debt accumulation, and prospects for future growth.

Resource Sustainability and Caribbean Development

Climate change will have a profound impact on human and natural systems, and will also impede economic growth and sustainable development. In this book, leading experts from around the world discuss the challenges and opportunities in building a climate resilient economy and society. The chapters are organised in three sections. The first part explores vulnerability, adaptation and resilience, whilst Part II examines climate resilience-sectoral perspectives covering different sectors such as agriculture, fisheries, marine ecosystems, cities and urban infrastructure, drought prone areas, and renewable energy. In the final part, the authors look at Incentives, institutions and policy, including topics such as carbon pricing, REDD plus, climate finance, the role of institutions and communities, and climate policies. Combining a global focus with detailed case studies of a cross section of regions, countries and sectors, this book will prove to be an invaluable resource.

The Economics of Sustainable Development in Small Caribbean Islands

For many islands, tourism is the main economic activity in terms of income generation, employment creation and foreign exchange earnings. However, due to

their small size, islands are also particularly vulnerable to the negative environmental and social impacts that tourism can sometimes bring. This report reviews the current status of tourism in small island developing states (SIDS) and considers the key policy issues that need to be considered in order to support the management of sustainable tourism development for the long-term.

Assessing the Structure of Small Welfare States

This study analyses good practices and gaps in education for sustainable development (ESD) implementation in ten small island states vulnerable to climate change. It provides practical and realistic recommendations on how ESD may be better integrated in education policy and strategy and delivered more comprehensively.

SOCIAL POLICIES IN SMALL STATES SERIES The country case studies and thematic papers in this series examine social policy issues facing small states and the implications for economic development. They show how, despite their inherent vulnerability, some small states have been successful in improving their social indicators because of the complementary social and economic policies they have implemented. THEMATIC PAPER - THE WELFARE STATE Historically, the welfare state evolved as the most efficient policy response to caring for a large, homogeneous population. This traditional model, however, loses importance as population size falls below 3-4 million, especially for states where a significant number of the population migrate and send remittances home, and where the country is the recipient of overseas aid. Facilitating the international mobility of people therefore becomes central to social policy and insofar as the welfare state occurs, it tends to be focused on the labour market. This paper examines how the characteristics of small states influence their pursuit of a welfare state. Many of the small states discussed have not previously featured in mainstream thinking about the relationship between country size and the extent of the welfare state.

Sustainable Tourism as a Factor of Local Development

This study forms an entirely new area of research on Small Island Tourism Economies (SITEs). It addresses the importance of uncertainty in monthly international tourist arrivals and country risk indicators to the macroeconomy. Conditional volatilities are estimated for international tourist arrivals, and an economic interpretation from the estimated results is provided. In achieving these two objectives, this work presents an extensive assessment of the important characteristics and the impact of tourism in SITEs in relation to their gross domestic product, balance of payments, employment and foreign direct investment, among other factors. This book is unique in giving emphasis to macroeconomic implications rather than an industry focus. The Economics of Small Island Tourism will appeal to academics at the undergraduate and postgraduate levels involved in environmental and tourism management as well as tourism economics.

Report of the Commission on Sustainable Development Acting as Preparatory Body for the Special Session of the General Assembly for the Review and Appraisal of the Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States

This publication presents an overview of the status of tourism in Small Island Developing States (SIDS), while providing evidence of the key importance it has for the sustainable development of many islands and for the achievement of the MDGs. It draws together and updates a wide range of evidence on tourism performance and impacts and on the factors affecting the future development of the sector in SIDS, and provides policy orientations, guidelines and other tools to the various tourism stakeholders in SIDS on how to address these challenges and develop and manage tourism in a sustainable manner for the benefit of their population.

Sustainable Development in South Asia

Shaping the Future of Small Islands

Organizations and businesses are applying sustainable development concepts in their management strategies in order to improve and rethink products, processes, services, and policies which will have significant potential to reduce carbon dioxide emissions, excess consumption, and improve the quality of lives. Cases on the Diffusion and Adoption of Sustainable Development Practices is a collection of case studies on the concepts and theories of successful sustainable practices. It also identifies key mechanisms and strategies that have allowed the successful diffusion of these practices into communities, regions and nations around the

world. This reference source is essential for professionals, researchers, educators and leaders in pursuit of innovative solutions in sustainable development.

Published by the American Geophysical Union as part of the Coastal and Estuarine Studies, Volume 51. Small tropical and subtropical islands are particularly attuned to the effects of the surrounding ocean and atmosphere. Frequently, these islands are densely populated and rely on the sea for sustenance and economic viability. Oftentimes too, individual island nations do not have the resources to address issues in oceanography and marine meteorology that are central to their future well-being. United Nations agencies, government and non-government organizations, and universities are dimly aware of their role to enhance collaboration between natural scientists and resource managers, particularly for Small Island Developing States (SIDS). Accordingly, a meeting entitled "Small Island Oceanography in Relation to Sustainable Economic Development and Related Coastal Area Management" was held in Martinique, French Antilles, November 8-10, 1993.

Making Development Co-operation Work for Small Island Developing States

This book brings policy-making for sustainable development into the mainstream of decision-making at all levels of governance and in all sectors. It builds on the 2005 internationally agreed 'Mauritius Strategy' which aims to implement the integration of sustainable development by small island developing states. Designed as a handbook for policy-makers and planners in government, as well as business and civil society leaders, it covers seven of the twenty issues that have been outlined in the Mauritius Strategy as being important for the sustainable development of SIDS - disaster management; marine resources; freshwater resources; land resources; energy resources; tourism resources and trade. It brings together best practices, policy options and development prospects that small states can pursue in order to achieve real progress in these fields. It covers the progress and experiences of countries in the Caribbean region, the Pacific region, and the Atlantic, Indian Ocean and Mediterranean region in their implementation of sustainable development in these areas. It also provides a useful point of reference and stimulus to policy-makers and their supporting colleagues from all sectors.

Sustainable Development Of Small Island Economies

With the potential to impact weather patterns, agriculture, and habitability of certain regions, global warming is a topic of interest to environmentalists, scientists, as well as farmers around the world. The threat of food shortages and famine especially becomes a major concern as a result of recent climate shifts. Impacts of Climate Change on Food Security in Small Island Developing States discusses the repercussions of a shifting climate on food production and availability in small island nations. Comprised of research-based chapters on topics relevant to crop management, sustainable development, and livestock management on island territories, this advanced reference work is appropriate for environmental researchers, food scientists, academicians, and upper-level students seeking the latest information on agricultural concerns amidst a changing climate.

Scientific and Technical Revolution: Yesterday, Today and Tomorrow

This book analyses Jamaica's ability to satisfy its short and long run foreign currency obligations in light of recurrent balance of payment support from international lending agencies. Jamaica is one of the top five indebted nations in the world, and despite entering 13 successive arrangements with the International Monetary Fund over the past 40 years, its depreciating currency continues to drive up debt servicing requirements. The island nation's longstanding relationship with multilateral lending agencies like the IMF serves as a case study for other developing countries that are unable to generate sufficient intrinsic net international reserves and, consequently, suffer from incredibly low GDP growth per annum. The book closes with policy recommendations to bolster the Jamaican economy into solvency so that it can create a sustainable foreign debt repayment plan, and suggests strategies for supporting local economic objectives within global geopolitical constraints.

Tourism Development, Governance and Sustainability in The Bahamas

This book presents a system view of the digital scientific and technological revolution, including its genesis and prerequisites, current trends, as well as current and potential issues and future prospects. It gathers selected research papers presented at the 12th International Scientific and Practical Conference, organized by the Institute of Scientific Communications. The conference "Artificial Intelligence: Anthropogenic Nature vs. Social Origin" took place on December 5-7, 2019 in Krasnoyarsk, Russia. The book is intended for academic researchers and independent experts studying the social and human aspects of the Fourth Industrial Revolution and the associated transition to the digital economy and Industry 4.0, as well as the creators of the legal framework for this process and its participants - entrepreneurs, managers, employees and consumers. It covers a

variety of topics, including “intelligent” technologies and artificial intelligence, the digital economy, the social environment of the Fourth Industrial Revolution and its consequences for humans, the regulatory framework of the Fourth Industrial Revolution, and the “green” consequences, prospects and financing of the Fourth Industrial Revolution.

Handbook of Small States

This book focuses on the complex issues of tourism development, governance and sustainability in the long-standing popular island destination, The Bahamas, where tourism remains one of the primary fiscal industries. The book achieves this by looking at the impacts of mass tourism development from social, economic and environmental perspectives; panarchy and resilience; assessing sustainability; moving towards a blue economy; impacts of climate change and innovative alternative tourism offerings to ensure sustainable tourism – a welcomed but challenging essential contemporary focus of the tourism industry. It further looks at how development, governance and sustainability come together in the aftermath of a recent natural disaster, hurricane Dorian, which proved to be a strong catalyst for action, innovation and change in The Bahamas. Given the complexity of these key concepts and The Bahamas as an established popular tourism destination archipelago which relies so heavily on the industry, this book offers significant insight for other tourism regions and will therefore be essential reading for upper-level students and academics in the field of Tourism research.

Impacts of Climate Change on Young People in Small Island Communities

Land Degradation Neutrality in Small Island Developing States

Small Island Developing States (SIDS) are continuously under the threat from the adverse effects of climate change and land degradation impacts. Land degradation directly increases CO₂ emissions, contributing to climate change and vice versa. The LDN Target Setting Programme (TSP) of the UNCCD has substantially contributed to land degradation receiving the policy attention and securing political commitments for addressing the obvious and immediate threats of climate change and natural disasters to SIDS. It has strengthened the availability and accessibility of data for assessing land degradation and enabled SIDS to set specific measurable science-based targets. LDN provides the framework for the sustainable development of human settlements in SIDS through policy, planning, design and regulatory instruments.

made in the 1960s. The island's remarkable economic performance since the 1980s can be attributed to a multitude of factors instrumental to the success of the economy, including structural reforms, outward looking export orientated strategies, diversification in the manufacturing, tourism and financial services sectors amongst others, sound economic governance and institutions, and significant investment in human capital. This book attempts to provide a detailed analysis of the various key ingredients which have helped to propel Mauritius to its current status. The various chapters provide important readings for both academics and policymakers, with the final chapter providing key policy strategies which the government needs to implement to help Mauritius graduate to the next level of development: namely to that of a high-income economy and, in moving out of the middle-income trap, laying the foundations for future growth and shared prosperity in the light of both domestic challenges and global constraints.

Caribbean Public Policy

This book presents a comprehensive overview of the history, definition, causes, effects, impacts and implications of climate change on young people globally, with a focus on Small Island Communities (SIDS) in particular. The text highlights the key problems associated with the impact of climate change on young people in SIDS, specifically its effects on socio-economic development and livelihoods, and explores the need for the development of a new conceptual framework to deal with building the resilience of the adaptive capacity of youth in SIDS. The book analyzes the strengths and weaknesses of the emerging phenomenon of Global Youth Climate Change Movements/Actions, and examines the management/governance challenges associated with the Movement in terms of its operational mechanism, mobilization strategies and its use of social media/technology to mobilize mass action. The text concludes with a recommendation for further research in this area as a way to understand how the Movement functions and its mechanism for implementation of future research.

Challenges and Opportunities for Tourism Development in Small Island Developing States

Focusing especially on Pacific islands such as Fiji, Tonga, Western-Samoa, Hawaii, Saipan, and the Ryukyu Islands, this book examines the self-reliant, sustainable development of small island economies.

Achieving Sustainable Fisheries

This book provides a thorough grounding in bringing sustainable development to the forefront of policy-making. It advises small states on how to devise practical national strategies, addresses the need for legislative change, and examines methods for monitoring progress. Contributors range from international academics to economists.

Sustainable development goals and trade

This handbook covers a wide spectrum of issues relating to small states. Chapters

Where To Download Sustainable Development In Small Island Developing States Issues And Challenges Economic Paper Series

in the volume have been grouped under the three main themes of economic, social and environmental issues. The economics sections include chapters dealing with trade, finance and regulatory frameworks, while the social theme covers health, migration, population ageing, as well as overall social wellbeing. The environmental theme examines matters such as measuring environmental performance, natural disasters, the ocean economy, and the validity of the Sustainable Development Goals. One major issue is the definition of small states. As this volume demonstrates, generally speaking, population is used to measure country size in the literature. However, it clearly emerges that there is no real consensus as to the population cut-off point that distinguishes small states from large ones. While the approaches taken by the authors vary, in all cases the chapters draw practical policy implications for small states. The book can therefore be considered as a wide-ranging depository of information on small states with the aim of deriving policy prescriptions, and thus as an excellent resource for academics, students and policymakers.

The Vulnerability of the Small Island Developing States of the Caribbean

This book elaborately describes the major issues of sustainable development in South Asian Countries. It includes the basic concepts, paradigms, policies, management and latest details about the subject in this region. It will be highly valuable reference to policy makers, researchers, scholars, environmentalists, and so on.
