MotorBoating

This memoir/autobiography celebrates 50 years of Junior Recruit service to our navy. Established in 1960 and decommissioned in 1984 the story follows the life of a 15 year old inducted into the service for twelve years in 1968 and sent to Vietnam on the Vung Tau Ferry (H.M.A.S. Sydney) the following year. His somewhat capricious journey begins from his hometown of Seven Hills, to the Seven Seas, with a hint of mysticism along the way. The Commemorative year of 2010 recognised the contributions made by young teens, many still children, to their country. My story is partly dedicated to those who didn't survive physically and/or mentally serving at a time when bullying and bastardising was the model in the defence forces, along with an element of stoic indifference on behalf of the young recruits' custodians, although not always. Furthermore, the world was on its own path to perdition at this critical time in our history. *Mark has won a literary award in 2009 for his short story under the title 'A New Life' at the beginning of this book. Also, he has 2 previous non-fiction books published in Australia by Zeus Publications in 2006 and 2009.

All About Powerboats: Understanding Design and Performance

This book presents the findings of experimental and theoretical (including first-principles molecular dynamics simulation) studies of nanostructured and nanocomposite metal-based materials, and nanoscale multilayer coatings fabricated by physical or chemical vapor deposition, magnetron sputtering, electrospark alloying, ionic layer absorption, contact melting, and high-current electron beam irradiation. It also discusses novel methods of nanocomposite formation, as well as the structure of the deposited films, coatings and other nanoscale materials, their elemental and phase composition, and their physical-mechanical, tribological, magnetic and electrical properties. Lastly, it explores the influence of a various surface modification methods, such as thermal annealing, pulsed laser modification, and thermomechanical and ultrasonic treatment, as well as different properties of nanostructured films.

Understanding and Prediction of Thermohydraulic Phenomena Relevant to Supercritical Water Cooled Reactors (SCWRs)

Everything about this trip to Grandma's house was different: First, because of the fire, Mrs. Treski, Evan, and Jessie had driven up to Grandma's two days after Christmas instead of the day before, missing Christmas with Grandma entirely. Second, the fire had left a hole in the back kitchen wall big enough to drive a car through! And with Grandma in the hospital and not in her house, everything felt off. Third, someone had climbed the long, slow slope of Lovell Hill to the top and had stolen the old iron bell hanging on its heavy wooden crossbeam. Who on earth

would steal the New Year's Bell? And how could Grandma, Mrs. Treski, Evan, Jessie, and their neighbors ring in the New Year without it? Like a modern-day Beverly Cleary, Ms. Davies writes with heart, humor, and honesty about the inevitability of profound change and reveals just how well she understands the complex emotions of the children.

In this stunning follow-up to his best-selling book, *The Five Temptations of a CEO*, Patrick Lencioni offers up another leadership fable that's every bit as compelling and illuminating as its predecessor. This time, Lencioni's focus is on a leader's crucial role in building a healthy organization--an often overlooked but essential element of business life that is the linchpin of sustained success. Readers are treated to a story of corporate intrigue as the frustrated head of one consulting firm faces a leadership challenge so great that it threatens to topple his company, his career, and everything he holds true about leadership itself. In the story's telling, Lencioni helps his readers understand the disarming simplicity and power of creating organizational health, and reveals four key disciplines that they can follow to achieve it.
