Free-living birds encounter multiple health hazards brought on by viruses, bacteria, and fungi, some which in turn can significantly impact other animal populations and human health. Newly emerging diseases and new zoonotic forms of older diseases have brought increased global attention to the health of wild bird populations. Recognition and management of these diseases is a high priority for all those involved with wildlife. Infectious Diseases of Wild Birds provides biologists, wildlife managers, wildlife and veterinary health professionals and students with the most comprehensive reference on infectious viral, bacterial and fungal diseases affecting wild birds. Bringing together contributions from an international team of experts, the book offers the most complete information on these diseases, their history, causative agents, significance and population impact. Focusing on more than just treatment, special emphasis is given to disease processes, recognition and epidemiology.

Zen koans, beginning some 1500 years ago, refer to stories or questions arising in encounters between monks and old Chinese and Japanese masters, and include commentaries designed to help the Zen practitioner awaken. Koans like Hakuin's What is the sound of one hand clapping? are well-known, and the word koan has even gone mainstream. Thousands of classic koans emerged from the lives of monks living inside a Chinese or Japanese culture, and the commentaries on those koans contain poetic elements and images that have proved challenging for many Westerners. The Book of Householder Koans is a collection of koans created by 21st century Zen practitioners living a lay life in the West. The koans deal with the challenges of relationships, raising children, work, money, love, loss, old age, and death, and come from practitioners across three continents, and with commentaries by two Western teachers. The collection is based on the premise that our lives as householders contain situations rich with challenge and grit, the equivalents of old Zen masters' shouts or blows meant to sweep the ground right from under their students. They become koans, or koan practice, when they jolt us out of our usual way of thinking, when we're no longer observers of our lives but plunge in, closing the gap between ourselves and the situation we face.
