The Wagner Story Book

THE ANGEL IN LA is a gripping, nonfiction novel combining absolute realism, humor, and a moving, supernatural twist. While on the tennis tour, Merritt is confronted by an angel in Los Angeles who guides him with a directive. From this point forward Merritt is haunted and oppressed by his heinous nemesis alcohol in a clash of Darkness versus Light. Although it is seemingly winning, causing Merritt to become homeless and a fugitive of the law, he never forgets the angel who tenaciously pursues him and spurs him towards recovery. If you have ever been curious what really goes through the mind of a chronic alcoholic/addict, then walk with Merritt and get a firsthand peek into the secret underworld of alcoholism, which lured him into boundless depths of assorted self-indulgence beginning in Los Angeles. Unlike "Leaving Las Vegas" this true story is about hope and a strong will to live. Excerpt from The Angel in LA: "A shaft of morning light sloped on his face with its warm, radiant power, exposing deep lines that should not have been there. But it was also a face that had witnessed something profoundly mystical-something so intensely spectacular he could not let go of it as hard as he tried."".The book is a well-written and gripping account of what you experienced as your life unraveled, but also the transformation that you

experienced as you and your Higher Power worked together to overcome and win the battle. Keep telling your story.there is always one more person who needs to hear it!" James Van Hecke, Jr., President of Addiction Recovery Institute"It is the riveting story of an alcoholic with a promising life tossed aside due to the destructive force of addiction." Sheri Wilson Kerhulas"This is definitely a page turner, and a wonderful story of redemption. A must read for anyone who feels lost!" Beth Gable

Title: The Crash Crystal: a LEGO® Mystery. A middle-grade novel for 9-12 year-olds Using LEGOS that he assembles in eerily accurate crash-site scenes, Mack McCarthy (12) can predict why planes crash with dead-on accuracy, amazing his initially doubtful mother and father, a top crash-site investigator. But Mack is sure his power is real, passed on to him through a crystal by his mystical grandfather, who dies just as the book opens. Defying skeptics, Mack uses Legos to solve crash after crash, proving he's got a very rare gift indeed. When Mack's aunt - his only faithful believer all along - ends up on a criminally doomed flight from Thailand, a daring, international, kids-on-the-run, romping story ensues. Mack teams up with school buddies to evade police, as they use any means necessary to save lives. Then, in the ultimate test of Mack's rare gift, he gets to prove his doubters wrong once and for all when he and his father team up with a larger cadre of oddly gifted kids (who mysteriously appear with their LEGOS), to rescue themselves when the flight they are all on encounters fatal trouble.

Synopsis of Orthopaedics with Question Bank & Mnemonics

This is a publication of Floricanto and Berkeley Presses. This is a powerful reflection-of a sincere man dedicated to the betterment of his Mexican American people-on the very deep, personal, structural and historical root causes of segregation and its dehumanizing effects. A personal and intimate story of the life of Gilberto Aguirre growing from infant to successful physician. From living in the barrio to a respectful neighborhood, you meet his family, friends, teachers, coaches and fellow workers that make up his multiply divided world of many social, economic and racial tensions. You experience the agonies and the joys, the frustrations and dreams, the painful insults and encouraging moments, and most of all the hard work fueled by the deep commitment to overcome the inferiority complex by achieving success without losing his Mexican American soul. The most powerful, beautiful and moving section of the book is the account of his first born son, Jaime. Jaime has struggled through life with many physical difficulties, yet he is the most positive individual I have ever met. Gilberto states: "What Jaime has accomplished in view of the obstacles presented to him far outweighs my own accomplishments." This is a very enjoyable book that presents both a challenge to all young people to overcome difficulties and hope that success is possible by being truly yourself. It tells the story of one man but in reality it is the story of Mexican Americans

and other minorities, he does not claim to speak for anyone, but in him all of us can find elements of our own story. It will be especially beneficial to minority pre-med students seeking to enter the medical profession. I loved the book! A proud American of Mexican heritage

Do You Really Need Spine Surgery?

Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. While they always hoped to go somewhere fun like Disney World or Universal Studios, they usually went somewhere weird and cheap that their father, former boy bander Don Masters, found in an ad in a truck stop coupon magazine. But this year was different. Where they went couldn't be found on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where they met world famous action movie star Jordie Paine -- star of such films as I Plan to Kill You Now and the sequel, I Plan to Kill You Now, Too, the ninja film, Chuck Butcher: Sword Wielding Jackal, as well as the light-hearted romp, Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or crimpetitors, compete for their freedom. In this scifi comedy, the stakes are very simple -- if they win, they rule, if they lose, they must suffer the consequences.

Synopsis of Clinical Oncology

Contemporary spinal surgeons, whether orthopedic or neurosurgeons, are increasingly recognizing minimally invasive spine surgery (MISS) as a desirable option to manage advanced degenerative diseases. MISS techniques minimize blood loss, surgical site pain, and speed recovery. Thus, the marriage of MISS with adult spinal deformity was a natural one. Currently, the techniques, technologies, and education of surgeons have finally reached a point where MISS deformity surgeries are becoming commonplace. Nevertheless, the field is young enough that no comprehensive texts have addressed the unique challenges faced by surgeons exploring this evolving field. This book will fill the gap.

A compass is a very helpful tool-as long as its wielder knows the direction he wants to go. This wasn't often the case in the sixties in America, when many felt directionless, with an unpopular war that had the country's moral compass spinning. "Hope Points North" is a coming-of-age experience that takes place on Long Island during this turbulent period. Of the three boys, Chris McKellar is the conventional one of the group-the glue that binds the troubled Teddy and smart, introverted Charlie together. The story is Chris's adult recollection of the time when he, Teddy, and Charlie decide to travel on their own to Grumman Aerospace Company, the builders of the Lunar Excursion Model-the craft that will eventually deliver man to the moon. Just as the boys embark on their journey, the dark-hearted preacher Lovejoy ambushes them. Teddy's grandpa has amassed a secret fortune, but it's no secret to Lovejoy, who is seducing Teddy's mother and will do anything to get the money. But the boys resist the preacher's attack in a way that leaves him dead in the creek so they think. In shock, they follow their compass, toward the fraternity of hopes, dreams and, unsuspectingly, manhood.

Synopsis of Orthopaedic Trauma Management

With a supernatural undercurrent, *The Fourth Marker* is the story of an elderly man, Gabriel Townsend, whose spirit is being crushed between the metaphoric anvil of his pragmatic views and the falling hammer of his wife's pending death. The story revolves around a family, the Townsends, whose heritage is partly Native American. The United States' Indian Removal Act of 1830, which resulted in the Trail of Tears episode in American history, required all indigenous people, with few exceptions, to leave their tribal lands in the southeast and east, along the eastern seaboard. Some Lenape (Delaware) tribal members on the Delmarva Peninsula as well as other areas in the east, defied the government and remained on their ancestral lands, hiding from authorities in the Great Pocomoke Forest, outlying islands, and swamps on the southern peninsula. A conscious decision to "hide in plain sight" or not, they eventually intermarried and bred with local whites, African-Americans, and mulattoes. Many families whose ties to Delmarva date back a hundred years or more share a heritage with those aboriginal people; however, the prejudice and racial bias of a bygone era caused many to ignore – even deny – their lineage. In the story, while a child on the family farm during the Great Depression, Gabe Townsend rejected legends of his Native American ancestors and ignored miraculous cures of family members. Gabe's half-breed grandfather, Noopah, tried to teach him tribal legends and the old ways, explaining that, after most Indians had been killed or driven from their lands by the Army and settlers, tribal elders returned to their lands in spirit form after their deaths. They dwelled at a sacred hill on the family's land and protected their descendants from early death and white man's diseases. During those years, three family members were cured of life-threatening diseases, but Gabe's mother blindly credited their recoveries to the nascent field of modern medicine. After each recovery, a person of evil character and not of tribal blood disappeared, followed by the mysterious appearance of a wood marker on the sacred tribal hill. Yet, despite those events and Noopah's words, Gabe adhered to his mother's intractable views. Now facing the loss of his wife, he relives his childhood memories, guided by the spirit of his grandfather from beyond – well beyond – the grave. Finally understanding the truth of long ago, he decides to beg the tribal spirits to take his life in exchange for his wife's, aware that a fourth marker would signify his own life – and death. As Gabe's father noted, "some understand only what they see; others see only what they understand." *The Fourth Marker* highlights this most human of vices against the backdrop of Native American legends with
