Career Planning for Everyone in the NHS

Every parent wants the best for their child. That's why they send them to college! But most parents struggle to pay for school and end up turning to student loans. That's why the majority of graduates walk away with \$35,000 in student loan debt and no clue what that debt will really cost them.¹ Student loan debt doesn't open doors for young adults—it closes them. They postpone getting married and starting a family. That debt even takes away their freedom to pursue their dreams. But there is a different way. Going to college without student loans is possible! In Debt-Free Degree, Anthony O'Neal teaches parents how to get their child through school without debt, even if they haven't saved for it. He also shows parents: *How to prepare their child for college *Which classes to take in high school *How and when to take the ACT and SAT *The right way to do college visits *How to choose a major A college education is supposed to prepare a graduate for their future, not rob them of their paycheck and freedom for decades. Debt-Free Degree shows parents how to pay cash for college and set their child up to succeed for life.

Campus Compact's Introduction to Service-learning Toolkit

Have you ever thought about the fact that a craftsman has more and better tools to solve challenges on the job than the leader of a business or organization does? Leadership "tools" are usually defined as computers, spreadsheets, data, and even experience, but in reality, leaders need thinking tools that are hard to come by, so

Access Free The Career Toolkit For High School Students Making The Transition From School To Work

they find themselves hunting and pecking for answers in books, at seminars, through on-the-job training programs, from mentors, and at business schools, and still, they're left with gaps. Surely, most leaders are good at what they do, but the daily challenges of their jobs, like accelerating growth, increasing productivity, driving innovation, doing more with less, and balancing work with life don't come with some sort of leadership toolkit until now. In *Paid to Think*, international consultant David Goldsmith presents his groundbreaking approach to leadership and management based on research revealing the twelve specific activities that all leaders perform on a daily basis, and he provides you with each activity's accompanying tools and instructions proven to boost your performance and that of your entire organization. Take the uncertainty out of everyday leading, convert ideas to realities, and maximize your intellectual value. Learn how decision makers at some of the world's most successful organizations have already used *Paid to Think's* universal and easily transferable tools--regardless of their industries, sectors, geographic locations, or management levels--as their greatest advantages in achieving more, earning more, and living more.

The Politics of Promotion

Access Free The Career Toolkit For High School Students Making The Transition From School To Work

The GMS Toolkit

Many women focus on their performance, expecting that if they excel and accomplish the most, they'll get the promotions and recognition they deserve. And yet, all too often, women are outsiders to the networks of power and influence where the decisions are made that affect their careers. They may view politics as dirty; they may be slow to self-promote, build and nurture relationships with key stakeholders, and seek sponsorship. The result? They get blindsided, experiencing deep disappointment when their hard work alone doesn't pay off with an anticipated promotion or raise. Ambitious women understand they must play politics, but how can they learn to do it successfully? The Politics of Promotion demonstrates to women the importance of understanding workplace politics and provides them with the necessary tools to successfully navigate the political realities of their organization. While there are many books that advise women to be more assertive and embrace their ambition, and books that address office politics, there is little information focused specifically on how women can successfully navigate the politics in the current work environment. The Politics of Promotion provides a unique and proven method to guide women through the complexities of office politics, so that they can avoid a political "blindside" that may sabotage their career.

The Competency Toolkit

There is an urgent need not only to attract more people into the teaching profession but also to build a more diverse, highly qualified, and culturally sensitive teaching force that can meet the needs of a rapidly changing school-age population. This Toolkit takes best practices from high school teacher academies around the United States and organizes them into the steps needed to design and implement programs. The purpose of the Toolkit is to help school districts plan and institutionalize high school teaching academies in order to nurture and "grow" prospective teachers committed to serving their schools and communities. Research done by the Urban Teacher Academy Project suggests that there are approximately 50 teacher academy programs in the country. These high school teacher academies are teaching-focused, comprehensive academic programs within larger schools, most of which offer electives related to teaching, learning, and children, with precollege internships in schools and partnerships with colleges and universities that provide a pathway into college and teacher education. The guide's first chapter gives strategies for putting the elements of a successful teaching career academy into place. The second chapter explains the important elements of effective programs and gives a look at how these elements have been implemented in other teaching academies. The third chapter provides advice on how to document and assess a program. An appendix provides useful information about other national precollegiate teacher recruitment programs to supplement or

support teaching career academy activities. A planner's checklist is included to outline steps in designing a teaching career academy. An appendix contains descriptions of three teaching career academy programs, and a list of useful resources for establishing a teaching career academy is included. (SLD)
