Over the past several decades, civil and ethnic wars have undermined prospects for economic and political development, destabilized entire regions of the globe, and left millions dead. States, Scarcity, and Civil Strife in the Developing World argues that demographic and environmental stress--the interactions among rapid population growth, environmental degradation, inequality, and emerging scarcities of vital natural resources--represents one important source of turmoil in today's world. Kahl contends that this type of stress places enormous strains on both societies and governments in poor countries, increasing their vulnerability to armed conflict. He identifies two pathways whereby this process unfolds: state failure and state exploitation. State failure conflicts occur when population growth, environmental degradation, and resource inequality weaken the capacity, legitimacy, and cohesion of governments, thereby expanding the opportunities and incentives for rebellion and intergroup violence. State exploitation conflicts, in contrast, occur when political leaders themselves capitalize on the opportunities arising from population pressures, natural resource scarcities, and related social grievances to instigate violence that serves their parochial interests. Drawing on a wide array of social science theory, this book argues that demographically and environmentally induced conflicts are most likely to occur in countries that are deeply split along ethnic, religious, regional, or class lines, and which have highly exclusive and discriminatory political systems. The empirical portion of the book evaluates the theoretical argument through in-depth case studies of civil strife in the

Philippines, Kenya, and numerous other countries. The book concludes with an analysis of the challenges demographic and environmental change will pose to international security in the decades ahead.

A Guide to the Study and Use of Military History

"The peril is not preeminently to the nation's purse; it is to its soul. The danger is not so much that we will fail to protect our interests, it is that we will betray our historic ideals There is no assumption made here that the nation has always lived up to its deals; it did, however, always look up to them. We believe that it needs to do so again." --from the Introduction In *The Imperial Temptation*, two eminent foreign policy experts warn that America has made a Faustian bargain in its quest for the leadership of a new world order. In its attempts to address the challenges posed by new global realities, the Bush administration, so argues *The Imperial Temptation*, has betrayed the fundamental ideals on which this country was founded. Criticizing the all-out military assault on Iraq as a disproportionate and inhumane response to the crisis, Tucker and Hendrickson argue that President Bush seized on the Iraqi invasion of Kuwait to crystallize its vision of a new world order that would reclaim America's position of world leadership. But, in choosing to wage war against Iraq when another alternative was available, the authors write, Bush made the use of force the centerpiece of his vision of world order. As a result, America has fastened on a formula that allows us to go to war with far greater

precipitancy that we otherwise might while simultaneously allowing us to walk away from the ruin we create without feeling a commensurate sense of responsibility. By leaving Iraq in chaos, America has succumbed to an imperial temptation without discharging the classic duties of imperial rule. The Imperial Temptation makes an important--and what is sure to be viewed as controversial--contribution to the national debate over the future of U.S. foreign policy and offers a revealing examination of the classic ideas underlying American diplomacy and their relation to the nation's historic purpose.

The Battle Behind the Wire

For more than a century, from 1900 to 2006, campaigns of nonviolent resistance were more than twice as effective as their violent counterparts in achieving their stated goals. By attracting impressive support from citizens, whose activism takes the form of protests, boycotts, civil disobedience, and other forms of nonviolent noncooperation, these efforts help separate regimes from their main sources of power and produce remarkable results, even in Iran, Burma, the Philippines, and the Palestinian Territories. Combining statistical analysis with case studies of specific countries and territories, Erica Chenoweth and Maria J. Stephan detail the factors enabling such campaigns to succeed and, sometimes, causing them to fail. They find that nonviolent resistance presents fewer obstacles to moral and physical involvement and commitment, and that higher levels of participation contribute to enhanced resilience,

greater opportunities for tactical innovation and civic disruption (and therefore less incentive for a regime to maintain its status quo), and shifts in loyalty among opponents' erstwhile supporters, including members of the military establishment. Chenoweth and Stephan conclude that successful nonviolent resistance ushers in more durable and internally peaceful democracies, which are less likely to regress into civil war. Presenting a rich, evidentiary argument, they originally and systematically compare violent and nonviolent outcomes in different historical periods and geographical contexts, debunking the myth that violence occurs because of structural and environmental factors and that it is necessary to achieve certain political goals. Instead, the authors discover, violent insurgency is rarely justifiable on strategic grounds.

Knowing America's Colony

Most armed conflicts since World War II have been neither conventional nor nuclear, but wars of a third kind, fought in developing nations and involving guerrilla warfare. Edward E. Rice examines historical combat of this sort, including the American Revolution, the Chinese civil war, the Huk rebellion in the Philippines, and conflicts in Algeria, Vietnam, and Latin America. Rice explores the origin, organization, and motivation of these wars and the dangers they pose to the powers that get involved in them. This companion volume to Paths to Victory: Lessons from Modern Insurgencies offers in-depth case studies of 41 insurgencies since World War II. Each case breaks the conflict into phases and examines the trajectory that led to the outcome.

Anatomy of Rebellion provides an understanding of four rebellions that will make clear the factors that are crucial in the development of other rebellions. Seeking a political pattern in the process of rebellion, Claude Welch, Jr., has investigated four large-scale rural uprisings that came close to becoming revolutions: the Taiping rebellion in China 1850-64, the Telengana uprising in India of 1946-51, the Mau

Mau rebellion in Kenya of 1952-56, the Kwilu uprising in Zaire of 1963-65. Weaving the facts of these rebellions with theories about political violence, Welch follows the rebellions through the initial stages of discontent to the explosion of violence to the suppression of the uprisings. He then challenges explanations of political violence, both Marxist and non-Marxist, that other scholars have proposed. Rebellions have not been studied as thoroughly as the major successful revolutions, although the frequency of rebellions in the modern world is not likely to diminish. Rural dwellers' discontents are still clashing with central governments' ambitions; *Anatomy of Rebellion* clarifies how this volatile type of political violence occurs.

The Hukbalahap Insurrection

War of the Flea

Newly available with an updated bibliographic essay, this highly acclaimed work explores the Huk rebellion, a momentous peasant revolt in the Philippines. Unlike prevailing top-down analysis, Kerkvliet seeks to understand the movement from the point of view of its participants and sympathizers. He argues that seeing a peasant revolt through the eyes of those who rebelled explains and clarifies the actions of people who otherwise might appear irrational. Drawing on a rich array of documents and in-depth interviews with peasants and rebel leaders, the author provides definitive answers to the causes of

the rebellion, the goals of the rebels, and the process of resistance.

Cultures at War

As early as the first millennium A.D., the Philippine archipelago formed the easternmost edge of a vast network of Chinese, Southeast Asian, Indian, and Arab traders. Items procured through maritime trade became key symbols of social prestige and political power for the Philippine chiefly elite. *Raiding, Trading, and Feasting* presents the first comprehensive analysis of how participation in this trade related to

broader changes in the political economy of these Philippine island societies. By combining archaeological evidence with historical sources, Laura Junker is able to offer a more nuanced examination of the nature and evolution of Philippine maritime trading chiefdoms. Most importantly, she demonstrates that it is the dynamic interplay between investment in the maritime luxury goods trade and other evolving aspects of local political economies, rather than foreign contacts, that led to the cyclical coalescence of larger and more complex chiefdoms at various times in Philippine history. A broad spectrum of historical and ethnographic sources, ranging from tenth-century Chinese tributary trade records to turn-of-the-century accounts of chiefly "feasts of merit," highlights both the diversity and commonality in evolving chiefly economic strategies within the larger political landscape of the archipelago. The political ascendance of individual polities, the emergence of more complex forms of social ranking, and long-term changes in chiefly economies are materially documented through a synthesis of archaeological research at sites dating from the Metal Age (late first millennium B.C.) to the colonial period. The author draws on her archaeological fieldwork in the Tanjay River basin to investigate the long-term dynamics of chiefly political economy in a single region. Reaching beyond the Philippine archipelago, this study contributes to the larger anthropological debate concerning ecological and cultural factors that shape political economy in chiefdoms and early states. It attempts to address the question of why Philippine polities, like early historic kingdoms elsewhere in Southeast Asia, have a segmentary political structure

in which political leaders are dependent on prestige goods exchanges, personal charisma, and ritual pageantry to maintain highly personalized power bases. Raiding, Trading, and Feasting is a volume of impressive scholarship and substantial scope unmatched in the anthropological and historical literature. It will be welcomed by Pacific and Asian historians and anthropologists and those interested in the theoretical issues of chiefdoms.

Why Civil Resistance Works

The Power of Everyday Politics

Six historic counterinsurgency (COIN) operations are examined to determine which tactics, techniques, and procedures led to success and which to failure. The Philippines, Algeria, Vietnam, El Salvador, Jammu and Kashmir, and Colombia were chosen for their varied characteristics relating to geography, historical era, outcome, type of insurgency faced, and level of U.S. involvement. Future U.S. COIN operations can learn from these past lessons.

Rebellion and Repression in the Philippines

When Algerian nationalists launched a rebellion against French rule in November 1954, France was forced to cope with a varied and adaptable Algerian strategy. In this volume, originally published in 1963, David Galula reconstructs the story of his highly successful command at the height of the rebellion. This groundbreaking work, with a new foreword by Bruce Hoffman, remains relevant to present-day counterinsurgency operations.

Everyday Politics in the Philippines

Since 1990 public political criticism has evolved into a prominent feature of Vietnam's political landscape. So argues Benedict Kerkvliet in his analysis of Communist Party-ruled Vietnam. *Speaking Out in Vietnam* assesses the rise and diversity of these public displays of disagreement, showing that it has morphed from family whispers to large-scale use of electronic media. In discussing how such criticism has become widespread over the last three decades, Kerkvliet focuses on four clusters of critics: factory workers demanding better wages and living standards; villagers demonstrating and petitioning

against corruption and land confiscations; citizens opposing China's encroachment into Vietnam and criticizing China-Vietnam relations; and dissidents objecting to the party-state regime and pressing for democratization. He finds that public political criticism ranges from lambasting corrupt authorities to condemning repression of bloggers to protesting about working conditions. *Speaking Out in Vietnam* shows that although we may think that the party-state represses public criticism, in fact Vietnamese authorities often tolerate and respond positively to such public and open protests.

Nearly five million migrant workers from the Philippines are employed in over 190 countries and territories. They work as doctors and domestic helpers, engineers and entertainers, seamstresses and surveyors. It is through their collective labor that the Philippines has assumed a global presence. For over five centuries the Philippines has been integrated into the world economy. Only recently, however, has the Philippines been a pro-active agent in the production of a global economy. Since the 1970s the Philippine state, in connection with myriad private institutions, has recruited, trained, marketed, and deployed a mobile work-force. Annually, approximately one million migrant workers travel to all corners of the world. The Philippines seeks to understand how the Philippines has become the world's largest exporter of government-sponsored temporary contract labor and, in the process, has

dramatically reshaped both the processes of globalization and also our understanding of globalization as concept.

But in the midst of the uncertainty and violence of rebellion, these women also pursued personal lives, falling in love,

From a military commander's perspective, the role of psychological operations (PSYOP) in the successful planning and execution of modern military operations is absolutely essential. It is an integral part of the United States Special Operations Command mission. Today, the military faces a dynamic and unpredictable world. PSYOP will remain a valuable instrument in the overall defense posture and will be a key asset in the fulfillment of U.S. national policy. This manuscript explores the breadth and depth of fundamental PSYOP roles, principles and methods. The Huk Rebellion

At a fairly early stage of socialism's penetration into the Afro-Asian world, a handful of European social democrats established an Indian Social-Democratic Association (ISDV). They did so in a country, Indonesia, that was economically little developed and far away from any of the centres of European socialism and Asiatic radical-nationalism. The ISDV was soon able to bring its influence to bear on sections of the urban proletariat and to build up an Indonesian revolutionary movement. This occurred in sharp competition with a nascent nationalist leadership, and then without the usual intermediary role played by radicalizing groups of native intelligentsia. In this way, Dutch social democrats laid the foundations for one of the first communist parties in Asia and Africa, a party which was destined to become one of the few communist mass parties of the Third World. However, in contrast to the major communist movements of China-Vietnam, this Indonesian party was to demonstrate a basic weakness: successive and catastrophic defeats. ! If we leave out Japan, the only non-Western country where a capitalist industrial revolution occurred, we see that foreign and particularly Western minorities frequently did play a dominant role in the initial and formative phases of the socialist and workers' movements of the Afro-Asiatic world.

Analyzing examples from North and South America, Europe, Africa, and the Middle East, he identifies recurrent patterns and offers useful lessons for future policymakers. Insurgencies arise from many sources of discontent, including foreign occupation, fraudulent elections, and religious persecution, but they also stem from ethnic hostilities, the aspirations of would-be elites, and traditions of political violence. Because insurgency is as much a political phenomenon as a military one, effective counterinsurgency requires a thorough understanding of the insurgents' motives and sources of support. Clear political aims must guide military action if a counterinsurgency is to be successful and establish a lasting reconciliation within a deeply fragmented society.

Monopoly of Force: The Nexus of DDR and SSR

This report finds parallels in U.S. prisoner and detainee operations in World War II, Korea, Vietnam, and Iraq: underestimation of the number to be held, hasty scrambling for resources, and inadequate doctrine and policy. Later, attempts to educate and influence prisoners and detainees are often made. The authors recommend that detailed doctrine should be in place prior to detention and that detainees should be surveyed when first detained.

Born of the People

The United Nations estimates that four billion people worldwide live outside the protection of the law. These people can be driven from their land, intimidated by violence, and excluded from society. This book is about community paralegals - sometimes called barefoot lawyers - who demystify law and empower people to advocate for themselves. These paralegals date back to 1950s South Africa and are active today in many countries, but their role has largely been ignored by researchers. Community Paralegals and the Pursuit of Justice is the first book on the subject. Focusing on paralegal movements in six countries, Vivek Maru, Varun Gauri, and their coauthors have collected rich, vivid stories of paralegals helping people to take on injustice, from domestic violence to unlawful mining to denial of wages. From these stories emerges evidence of what works and how. The insights in the book will be of immense value in the global fight for universal justice. This title is also available as Open Access.

Money in the Bank--Lessons Learned from Past Counterinsurgency (COIN) Operations

Ordinary people's everyday political behavior can have a huge impact on national policy: that is the central conclusion of this book on Vietnam. In telling the story of collectivized agriculture in that country, Benedict J. Tria Kerkvliet uncovers a history of local resistance to national policy and gives a voice to the villagers who effected change. Not through open opposition but through their everyday political behavior, villagers individually and in small, unorganized groups undermined collective farming and frustrated authorities' efforts to correct the problems. *The Power of Everyday Politics* is an authoritative account, based on extensive research in Vietnam's National Archives and in the Red River Delta countryside, of the formation of collective farms in northern Vietnam in the late 1950s, their enlargement during wartime in the 1960s and 1970s, and their collapse in the 1980s. As Kerkvliet shows, the Vietnamese government eventually terminated the system, but not for ideological reasons. Rather, collectivization had become hopelessly compromised and was ultimately destroyed largely by the activities of villagers. Decollectivization began locally among villagers themselves; national policy merely followed. The power of everyday politics is not unique to Vietnam, Kerkvliet asserts. He advances a theory explaining how everyday activities that do not

conform to the behavior required by authorities may carry considerable political weight.

"These innovative essays compel us to reevaluate our understanding of the Cold War as a predominantly political and military event. Their consideration of a broad range of cultural forms---from literature and film to glossy magazines and body-building---reminds us that the Cold War's influence on culture and its producers was as varied and complex as the Southeast Asian countries it touched. Lively and insightful, this rich collection is a valuable contribution to both Cold War studies and the modern histories of Southeast Asia."---Richard A. Ruth, Ph.D., Department of History, U.S. Naval Academy; and author of *In Buddha's Company: Thai Soldiers in the Vietnam War* *Cultures at War* examines how the cultures of postcolonial Southeast Asia responded to the Cold War. Based on fieldwork throughout the diverse region, these essays analyze the ways in which art, literature, theater, film, physical fitness programs, and the popular press reflected complex Southeast Asian reactions to the ideological conflict between the United States and the Soviet Union, and, to a degree, China. Determined to remain "nonaligned," artists synthesized traditional and modern, local and international sources to produce a vibrant constellation of work. For each of the national cultures discussed here, any Cold War tendency toward anxiety and conformity was challenged by creative pluralism and individual expression

The Regional Handbooks of Economic Development series provides accessible overviews of countries within their larger domestic and international contexts, focusing on the relations among regions as they meet the challenges of the twenty first century. The series allows the non-specialist student to explore a wide range of complex factors-social and political as well as economic-that affect the growth of developing regions in Asia, Europe, and South America. Each Handbook provides an overview chapter discussing the region's economic conditions within an historical and political context, as well as 20 or more chapter-length essays written by recognized experts, which analyze the key issues affecting a region's economy: its population, natural resources, foreign trade, labor problems, and economic inequalities, and other vital factors. In addition, the volumes offer useful support materials, including a series of appendices that include a detailed chronology of events in the region, a glossary of terms, biographical entries on key personalities, an annotated bibliography of further reading, and a comprehensive analytical index.
