The BIID Interior Design Job Book is the first book to set out the professional standard for running an interior design project. It does so step by step, in a sequence designed to complement the construction industry's standard Plan of Work, providing guidance at every stage of a job from appraisal of the client's requirements through to completion. Suitable for all interior design projects – whether small or large – and for both interior designers working in an integrated design team and those acting as lead consultant, it brings a codified procedure and a professional rigour to the way your practice works and the way your projects run – vital for achieving a professional edge in a competitive field. Its hands-on approach is supplemented by numerous model letters and specimen forms, which the designer can quickly adapt to any job in question.

Interior Design Masters contains 300 biographical entries of people who have significantly impacted design. They are the people, historical and contemporary, that students and practitioners should know. Coverage starts in the late Renaissance, with a focus on the twentieth and twenty-first centuries. The book has five sections, with the entries alphabetical in each, so it can serve as a history textbook and a reference guide. The seventeenth- and eighteenth-century section covers figures from Thomas Chippendale to Horace Walpole. The nineteenth-century section includes William Morris and Candace Wheeler. The early twentieth-century section presents modernism's design heroes, including Marcel Breuer, Eileen Gray, and Gilbert Rohde. The post-World War II designers range from Madeleine Castaing to Raymond Loewy. The final contemporary section includes Ron Arad and the Bouroullec brothers. These are the canonical figures who belong to any design history. The book also contains less well-known figures who deserve attention, such as Betty Joel, the British art deco furniture designer; Paul Veysseyre, the Frenchman active in China in the 1930s; and more recently Lanzavecchia-Wai, the Italian-Singaporean duo whose work ranges from health care to helicopters. Global in its coverage, the book is richly illustrated with over 600 black-and-white and color photographs.

### **Interior Design Sourcebook**

The National Council for Interior Design Qualification (NCIDQ) certifies interior designers in the United States and Canada with a 13 1/2-hour, closed-book exam, offered every April and October. The exam is divided into three sections, each of which may be taken individually. The Interior Design Reference Manual is the designer's primary source for exam preparation. This manual provides an overview of the exam topics and practice problems, with solutions. Updated for the new NCIDQ exam format, the second edition of the Interior Design Reference Manual is the most efficient and thorough review for the interior design exam. Along with an explanatory review of exam topics, the Manual provides 233 exam-like practice problems (with solutions) and test-taking strategy. The book is enhanced by illustrations, tables and charts of data, and a detailed index.

A practical approach to planning residential spaces Residential Interior Design: A Guide To Planning Spaces is the industry-standard reference for all aspects of residential space planning, with a practical focus on accessible design, ergonomics, and how building systems affect each space. This new third edition has been updated with the most recent code information, including the 2015 International Residential Code and the International Green Construction Code, and new content on remodeling. Packed with hundreds of drawings and photographs, this book illustrates a step-by-step approach to design that applies to any residential space, and ensures that the most important factors are weighted heavily in the decision making process. Daily use is a major consideration, and the authors explore the minimum amount of space each room requires to function appropriately while examining the host of additional factors that impact bedrooms, bathrooms, kitchens, hallways, and more. Detailed information about accessibility is included in each chapter, making this book a reliable design reference for "aging in place" and universal design. The new companion website features teaching tools and a variety of learning supplements that help reinforce the material covered. Interior design is a fundamental component of a residential space, and a required skill for architecture and design professionals. This book is a complete reference on all aspects of residential design, and the factors that make a space "work." Design spaces with primary consideration of daily use Account for building systems, accessibility, human factors, and more Get up to date on the latest residential interior building codes Plan interiors for any home, any style, and any budget Designing a residential interior is about more than choosing paint colors and furniture—it's about people, and how they interact and use the space. It's about shaping the space to conform to its function in the best possible way. Residential Interior Design provides clear, comprehensive guidance on getting it right every time.

"An essential text for all students of design . . . [and] inspiration and intel for those simply interested in the art and practice." --Alexa Hampton, from the foreword From the nation's top college for interior design comes a definitive design school in a book and a fabulous reference for decorating the home. In the past decade, New York School of Interior Design, which was founded in 1916, has drawn a large crossover audience of passionate decorating enthusiasts and hobbyists--many of them private homeowners who know that thinking like a professional is the surest way to achieve a magnificent home. This lavishly illustrated and highly detailed interior design bible provides a comprehensive education on home design and decor, from color theory principles to space-specific considerations (choosing furniture for a living room) and collaborating with architects and other professionals for the best results. Built on the Home Study Course that is the foundation of the school's curriculum, this book offers an unparalleled mastery of the key elements of enduring design, rendering it the only book you'll ever need.

### **The Codes Guidebook for Interiors**

The new comprehensive bible of interior design, from a home styling guru who has coached an entire Scandinavian generation in the art of creating a harmonious home. Frida Ramstedt believes in thinking about how we decorate, rather than focusing on what we decorate with. We know more today than ever before about design trends, furniture, and knickknacks, and now Frida familiarizes readers with the basic principles behind interior and styling—what looks good and, most of all, why it looks good. The Interior Design Handbook teaches you general rules of thumb—like what the golden ratio and the golden spiral are, the proper size for a coffee table in relation to your sofa, the optimal height to hang lighting

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.

Interior design is a multidiscipline profession blending spatial, technical and aesthetic knowledge. The skill involved in manipulating these elements to solve specific design problems is intrinsically linked to drawing. Interior Design Drawing explores all aspects of this vital design skill, from sketching to record information, through orthographics and development to analyse the problem, to presentation drawing to communicate the solution. Explore the role of drawing in the design process; understand the main orthographic drawings; use line, tone and colour across 2D and 3D drawings; add texture and atmosphere to drawings; consider aspects of composition and presentation of a set of drawings; an overview of how drawing relates to the process of interior design. This guide covers sketching to record information, elevation and projection, and making final presentation drawings to communicate solutions to clients. Fully illustrated with over 100 colour illustrations. Alan Hughes has an MA in Interior Architecture and has taught at undergraduate and post-graduate levels for many institutions.

Space planning involves much more than sketching a preliminary floor plan. A designer must take a client's programming needs into account and must also consider how other factors such as building codes and environmental factors affect a spatial composition. *Space Planning Basics*, now in its Third Edition, offers a highly visual, step-by-step approach to developing preliminary floor plans for commercial spaces. The book provides tools for visualizing space and walks the designer through other considerations such as building code requirements and environmental control needs. Specific programming techniques covered include matrices, bubble diagrams, CAD templates, block plans, and more. New to this edition are coverage of the basics of stair design, an essential aspect for planning spaces.

## **Interior Design Masters**

The second edition of The Fundamentals of Interior Design provides a thorough introduction to the key elements of interior design and the ideas that underpin them. The book describes the entirety of the creative process, from researching initial ideas to realizing them in three-dimensional form. Throughout the text, guidelines are given to provide structure to the interior design process and the reader is encouraged to adapt and initiate methodologies to suit individual project needs. This approach is intended to give designers a belief in their own abilities, and the confidence to tackle different projects with the unique challenges that each one brings. The book features a variety of diagrams and talking points to encourage students and practitioners to think about key issues such as understanding spatial relationships and the use of sustainable materials. This second edition includes new case studies focusing on well-known international interior design studios, such as Conran and Partners, UK, Slade Architecture, US, Gensler, US and award winning architects Chae-Pereira in South Korea. The introduction of interviews with contemporary interior designers allows readers an insight in to the working world of interior design. The new projects allow students to explore what they have learned in each chapter through experimentation and these activities encourage creativity and further learning.

## **Time-Saver Standards for Interior Design and Space Planning, Second Edition**

Interior design can be considered a discipline that ranks among the worlds of art, design, and architecture and provides the cognitive tools to operate innovatively within the spaces of the contemporary city that require regeneration. Emerging trends in design combine disciplines such as new aesthetic in the world of art, design in all its ramifications, interior design as a response to more than functional needs, and as the demand for qualitative and symbolic values to be added to contemporary environments. Cultural, Theoretical, and Innovative Approaches to Contemporary Interior Design is an essential reference source that approaches contemporary project development through a cultural and theoretical lens and aims to demonstrate that designing spaces, interiors, and the urban habitat are activities that have independent cultural foundations. Featuring research on topics such as contemporary space, mass housing, and flexible design, this book is ideally designed for interior designers, architects, academics, researchers, industry professionals, and students.

## **Interior Design Reference Manual**

A design solution is only as good as the quality of its research. Evidence-based design is an approach in which qualitative and quantitative research inform decisions. Evidence-Based Design for Interior Designers examines how designers conduct research into commercial and residential spaces and use this research to achieve optimal design solutions.
