### **Twilight Tours**

We live in a world of optical marvels - from the commonplace but beautiful rainbow, to the rare and eerie superior mirage. But how many of us really understand how a rainbow is formed, why the setting sun is red and flattened, or even why the sky at night is not absolutely black? This beautiful and informative guide provides clear explanations to all naturally occurring optical phenomena seen with the naked eye, including shadows, halos, water optics, mirages and a host of other spectacles. Separating myth from reality, it outlines the basic principles involved, and supports them with many figures and references. A wealth of rare and spectacular photographs, many in full color, illustrate the phenomena throughout. In this new edition of the highly-acclaimed guide to seeing, photographing and understanding nature's optical delights, the authors have added over 50 new images and provided new material on experiments you can try yourself.

### **A Study Guide for Anna Deavere Smith's "Twilight: Los Angeles, 1992"**

Every year thousands of private pilots buy a FAR/AIM with the intention of studying the regulations. My estimate is that the average pilot spends less than 20 hours a year using the FAR/AIM manual to increase their knowledge. Pilots have good intentions of studying, but the lack of use is mainly due to the poor study format of the FAR/AIM. The end result is that pilots understand only a small number of regulations. This study guide is going to change that! The Federal Aviation Regulations Study Guide for the Private Pilot is presented in a very study-friendly format. Our professional pilot staff reviewed all of the FARs and selected the regulations that apply to private pilots. Those regulations were then formatted into a study guide format with questions, answers and additional information. Whether you are preparing for your private pilot check ride, a biennial flight review, or a general review, this book will help you prepare much more efficiently and retain more information.
