Mysterious, Discovered, Accepted

You're beautiful and kind and very smart. But best of all, you're mine. Do you remember the stories your Grandma used to tell you every night about cursed beasts, village beauties, girls in red capes and wolves in disguises? Well, maybe, just maybe they actually do happen. Maybe, beasts do exist. They do. I would know. I am bound to one. Whom, you may ask? Well, I am mated to the Alpha King. How? You will see. You will live through it with me. I am Theia Anderson. I am just like any one of you, human, alive, and breathing. But unlike any one of you, I've stumbled upon a world that until yesterday I couldn't even fathom into existence. This is my story.

The Clash of Civilizations and the Remaking of World Order

Parasites is a YA science fiction, solarpunk exploration novel that takes place at the end of the universe, just as it slowly starts to contract in the 'big crunch'. On the planet Lyra, humans evolved late, on a resource-poor world, in a resource-poor solar system. The Lyrans master space flight, only to discover that their nearest worlds have also been stripped of resources. The population begins to decline, until a scientist discovers a technology allowing people and vehicles to travel through 'thinings' - patches of space linking universes. Kael and Alessia are explorers, charting where the thinings go and bringing valuable resources back to Lyra, trying desperately to extend the lifespan of their home world. Alessia's father, Ben, set out two years ago to uncover another species' reference to a 'solution' to the big crunch problem - but never returned. A chance discovery leads Kael and Alessia to a clue, prompting another expedition to see if they can avoid the mistakes of the past and help to unravel the mystery. Kael, Alessia and their gruff bodyguard Basteel retrace Ben's steps, seeking closure for Alessia, a solution for Lyra and together begin a voyage through wild, weird and wonderful planets.

The Color Purple

In her revelatory and redemptive memoir, Beverly Johnson, the first African American supermodel to grace the cover of Vogue, recounts her career in her own passionate and deeply honest voice. She chronicles her childhood as a studious, and sometimes bullied, bookworm during the sixties. She left college to pursue modeling and a successful three-decade career followed. Amid glamorous tales of the hard partying of the 1970s and Hollywood during the eighties, she details her many encounters and friendships with the likes of Jackie Kennedy, Halston, Calvin Klein, Andy Warhol, Elizabeth Taylor, Michael Jackson, Eddie Murphy, Jack Nicholson, Keith Richards, and Warren Beatty. But she also reveals the demons she wrestled with--her struggles with racism, drug addiction, and an abusive marriage followed by divorce proceedings which tested her fortitude and sanity. She shares for the first time intimate details surrounding her love affair with the late tennis icon Arthur Ashe, and pays homage to her mentor, the late Naomi Sims, while lifting the veil off the complicated and often tense relationships among models. Familiar names from the catwalk, such as Pat Cleveland and Iman, illustrate how each had to fight not just the system, but each other, in order to survive. More than five hundred magazine covers later, Johnson is now a successful businesswoman, actress, women's advocate, and philanthropist. This no-holds-barred look at the lives of the rich, fabulous, and famous is also a story of failure and success in the upper echelons of the fashion world, and how Beverly Johnson emerged from her struggles smarter, happier, and stronger than ever.--Adapted from book jacket.

Her Ideal Man

Bastian had to have been the most handsome man that Katherine had ever met. It really was unfortunate that he was also the most stubborn, controlling, downright infuriating jackass she'd ever known as well. Oh, and there was the fact that he was a werewolf – a werewolf who has bitten her. Sixteen-year-old Katherine Mayes had never believed in mythological creatures like werewolves or mermaids – certainly not those sparkly vampires that her friend Abby was obsessed with. Even when she's bitten by a massive animal after a reckless night of teenage adventure and her body begins to change in mystifying ways, she can't force herself to believe in what she's convinced is impossible. Little does she realize she's been infected with a disease a little more permanent than the rabies she feels fortunate to have not contracted. Lycanthropy. Her fierce denial is soundly shattered, however, when she is simultaneously saved and kidnapped by Bastian and his pack. Forced to leave small town Iowa behind and adjust to their way of life in a hidden society, Katherine must also deal with fighting the pull she feels towards the man – or wolf, rather – who has bitten her and disrupted her life so completely.

The Sleeping Night

A masterpiece of Biblical scope, and the magnum opus of one of America's most enduring authors, in a commemorative hardcover edition In his journal, Nobel Prize winner John Steinbeck called East of Eden "the first book," and indeed it has the primordial power and simplicity of myth. Set in the rich farmland of California's Salinas Valley, this sprawling and often brutal novel follows the intertwined destinies of two families—the Trasks and the Hamiltons—whose generations helplessly reenact the fall of Adam and Eve and the poisonous rivalry of Cain and Abel. The masterpiece of Steinbeck's later years, East of Eden is a work in which Steinbeck created his most mesmerizing characters and explored his most enduring themes: the mystery of identity, the inexplicability of love, and the murderous consequences of love's absence. Adapted for the 1955 film directed by Elia Kazan introducing James Dean, and read by thousands as the book that brought Oprah's Book Club back, East of Eden has remained vitally present in American culture for over half a century.

And when little Celina ran through his territory, he knew he was hers forever. Running away seemed to be the

Violence against Women of African Descent

The classic study of post-Cold War international relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, *The Clash of Civilizations and the Remaking of World Order* has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the shelf of only about a dozen or so truly enduring works that provide the

quintessential insights necessary for a broad understanding of world affairs in our time.” Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-civilization cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. The Clash of Civilizations and the Remaking of World Order explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly “universal” Western ideals, and intensify intercivilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multicivilizational world.
