Discovering Computers

With the iOS 6 software and the new iPhone 5, Apple has two world-class hits on its hands. This sleek, highly refined pocket computer comes with everything—cellphone, iPod, Internet, camcorder—except a printed manual. Fortunately, David Pogue is back with this expanded edition of his witty, full-color guide: the world's most popular iPhone book. The important stuff you need to know: The iPhone 5. This book unearths all the secrets of the newest iPhone. Taller screen, faster chip, 4G LTE Internet, thinner than ever. The iOS 6 software. Older iPhones gain Do Not Disturb, the new Maps app, shared Photo Streams, camera panoramas, smarter Siri, and about 197 more new features. It's all here. The apps. That catalog of 750,000 add-on programs makes the iPhone's phone features almost secondary. Now you'll know how to find, manage, and exploit those apps. The iPhone may be the world's coolest computer, but it's still a computer, with all of a computer's complexities. iPhone: The Missing Manual is a funny, gorgeously illustrated guide to the tips, shortcuts, and workarounds that will turn you, too, into an iPhone addict.

Laboratory Manual to Accompany Video Systems

This book provides fully up-to-date coverage of the whole range of current home video equipment, analogue and digital. As well as essential information for repair and troubleshooting, the author provides clear explanations of the technology of video equipment, which will enable the service engineer to gain a thorough knowledge of the equipment with which they are working. As well as traditional VCRs the scope of Video and Camcorder Servicing and Technology includes the full range of video cameras designed for home use and editing systems, and the latest DVD and hard-disk equipment. The resulting book is an essential bench reference tool for all service engineers, a guide to the technology for a wide range of professionals, and the most comprehensive college text for City & Guilds / EEB and other courses. Steve Beeching's guides to servicing video equipment have long been the definitive texts for service engineers and students. This book is the successor to the classic Servicing Video Cassette Recorder Equipment, which has been the leading PAL-based title on video equipment since 1983. Type 1 Diabetes - the body attacks and destroys the pancreatic beta cells, which make insulin. In the absence of these cells, insulin, the nutrients in food - and specifically glucose - cannot properly get in to the cells of the body and thus be used a source of energy. Type 2 Diabetes - there is both a decrease in the relative amount of insulin that the body can make and a decrease in the ability of insulin to act. This reduction in insulin action is termed insulin resistance - associated with excess weight, high blood pressure, high cholesterol levels and increased risk of cardiovascular diseases including heart attack and stroke.

Video Microscopy

Ever since television became practical in the early 1950s, closed-circuit television (CCTV) in conjunction with the light microscope has provided large screen display, raised image contrast, and made the images formed by ultraviolet and infrared rays visible. With the introduction of large-scale integrated circuits in the last decade, TV equipment has improved by leaps and bounds, as has its application in microscopy. With modern CCTV, sometimes with the help of digital computers, we can distill the image from a scene that appears to be nothing but noise; capture fluorescence too dim to be seen; visualize structures far below the limit of resolution; crisp images hidden in fog; measure, count, and sort objects; and record in time-lapsed and high-speed sequences through the light microscope without great difficulty. In fact, video is becoming indispensable for harnessing the fullest capacity of the light microscope, a capacity that itself is much greater than could have been envisioned just a few years ago. The time seemed ripe then to review the basics of video, and of microscopy, and to examine how the two could best be combined to accomplish these tasks. The Marine Biological Laboratory short courses on Analytical and
