## Perfect Lie

This is the first book on brain-computer interfaces (BCI) that aims to explain how these BCI interfaces can be used for artistic goals. Devices that measure changes in brain activity in various regions of our brain are available and they make it possible to investigate how brain activity is related to

experiencing and creating art. Brain activity can also be monitored in order to find out about the affective state of a performer or bystander and use this knowledge to create or adapt an interactive multi-sensorial (audio, visual, tactile) piece of art. Making use of the measured affective state is just one of the possible ways to use BCI for artistic expression. We can also stimulate brain activity. It can be evoked externally by exposing our brain to external events, whether they are visual, auditory, or tactile. Knowing about the stimuli and the effect on the brain makes it possible to translate such external stimuli to decisions and commands that help to design, implement, or adapt an artistic performance, or interactive installation. Stimulating brain activity can also be done internally. Brain activity can be voluntarily manipulated and changes can be translated into computer commands to realize an artistic vision. The chapters in this book have been written by researchers in human-computer interaction, brain-computer interaction, neuroscience, psychology and social sciences, often in cooperation with artists using BCI in their work. It is the perfect book for those seeking to learn about brain-computer interfaces used for artistic applications.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

This book comprises twelve articles which cover a range of topics from musical instrument acoustics to issues in psychoacoustics and sound perception as well as neuromusicology. In addition to experimental methods and data acquisition, modeling (such as FEM or wave field synthesis) and numerical simulation plays a central role in studies addressing sound production in musical instruments as well as interaction of radiated sound with the environment. Some of the studies have a focus on psychoacoustic aspects in regard to virtual pitch and timbre as well as apparent source width (for techniques such as stereo or ambisonics) in music production. Since musical acoustics imply subjects playing instruments or

### **Sound to Sense, Sense to Sound**

The unemployment rate is 10 percent. Taxes consume a huge portion of the working people's paychecks. Corruption dominates every level of the Government. The highest levels seek to turn control of the country over to the United Nations through the creation of a National Police force of the power-hungry Homeland Security, and it strips basic rights from the populace. David, an automotive technician, is a family man whose life seems to get worse by the day when he is placed in prison for a crime he did not commit. James is a Petty Officer on the aircraft carrier USS Jefferson. He longs for his childhood home in Alaska when times were more laidback and peaceful. His life becomes complicated when he discovers a spy aboard the ship. Benjamin, a divorced man with grown children, has been stockpiling supplies in an underground bunker in his home in Alaska. He senses something momentous is on the horizon but knows not what. The situation in the United States worsens beyond imagination, chaos ensues, and the three men race against time to find safety for themselves and their families in a world gone mad.

### **The History of Medicine in Alabama**

The intricate personal relationships of a notable Alabama family. Known respectively as the chief of the Confederate Ordnance Bureau and as the university librarian, Josiah and Amelia Gorgas were important members of the University of Alabama and regional communities. Their marriage spanned the Civil War and its aftermath and epitomized the Victorian concept of separate spheres for husband and wife. They were two strong personalities who deeply respected and complemented each other. *Love and Duty* focuses on the couple's relationship as well as their relationships with other Gorgas family members. Because the large but close-knit family was highly literate and often separated, they produced an extraordinary quantity and quality of correspondence and related manuscripts that span three generations. Family members corresponded with each other almost daily. In these letters and in journals, they commented on contemporary events, gave advice, philosophized about life, death, love, marriage, parenting, war, and defeat. These thousands of documents provide a remarkable window into the private world of a 19th-century southern family. *Wiggins* examines Josiah's and Amelia's attitudes

scientific, technological and artistic methodologies it aims at understanding, modelling, representing and producing sound and music using computational approaches. This book, by describing the state of the art in SMC research, gives hints of future developments, whose general purpose will be to bridge the semantic gap, the hiatus that currently separates sound from sense and sense from sound.

In his Confessions, St Augustine recounts the effect on him of hearing Bishop Ambrose explain various Old Testament passages figuratively: "These passages had been death to me when I took them literally, but once I had heard them explained in their spiritual meaning I began to blame myself for my despair, at least insofar as it had led me to suppose that it was quite impossible to counter people who hated and derided the law and the prophets." What was true of thoughtful people in St. Augustine's day is even more true today. For many in these 'enlightened' times,

Bible stories present a stumbling-block to considering any of the great Western faiths as providing a way of spiritual growth: some narratives seem to condone immoral actions while others seem worthy of mockery or strain good sense. But there is an 'inside' to these narratives far more digestible than their outside, and this inside is explored in Adam and Eve. From the episodes in the Garden of Eden to the Exodus from Egypt and the battle for entry into the Promised Land, one story after another receives a penetrating treatment revealing a current of esoteric meaning. The interpretations given are traditional in the truest sense of the word, and the author's hope is that this book will have the kind of effect on the contemporary reader that Bishop Ambrose's explanations had on St Augustine so many years ago. The author received his B.A. in Philosophy from Brooklyn College and his M.A. and Ph.D. in Philosophy from the University of Michigan. His thesis was in the field of Philosophy of Religion. He began his career at Virginia Polytechnic Institute and State University and is currently Professor of Philosophy at the University of Pittsburgh at Bradford. He is a member of both the American Philosophical Association and the American Academy of Religion. Becoming interested in Zen Buddhism while still an undergraduate, he proceeded to investigate most of the spiritual traditions of the East. Realizing that many Biblical verses could be interpreted as expressing what are normally considered Eastern ideas, he began systematic research into the question of whether Eastern and Western traditions really expressed the same basic truths. Adam and Eve is the first fruit of this endeavour, and this new edition greatly expands on

this research.

Sometimes love burns so hot in your veins that it consumes all rational thought. That's why Brock and I never had a chance. I had to start my life over. College was my chance to become someone new. I changed everything about myself to fit in, but one person saw through my facade. The attraction between Abel and I was undeniable, but I still hadn't healed from the painful secret I carried around with me. Abel struggled to get me to face my past in order to move forward. In doing so, he revealed a secret of his own; one that changed everything I thought I knew. A secret that would bring Brock back into my life and force me to face the truth of what really happened the day I lost him.

In the twenty-fourth chapter of Genesis a beautiful young woman offers assistance to a weary traveler and his camels, and out of that simple action, a marriage results—a marriage that offers profound lessons to couples today. Bible scholar and renowned speaker Ravi Zacharias draws five points critical to the long-lasting success of every marriage from the biblical story of the marriage of Isaac and Rebekah. "Real love folds together both the emotions and the will," writes Zacharias. "Without the emotions, marriage is a drudgery; without the will, it is a mockery." Building upon that foundational truth, Zacharias goes on to explain the principles of seeking the counsel of others when finding a mate, cherishing your partner, remaining pure, becoming a man or woman of prayer, and, finally, risking everything in a relationship in order to experience God's ideal for love. Couples everywhere, from those about to be married, to those who have been married for

decades, will draw strength and wisdom for the journey of marriage as they learn from Ravi what it means to move from romance to lasting love.

The essays in this volume explore the borderland between ecology and the arts. Nature is here read by a number of contributors as 'cultural', by others as an 'independent domain', or even as a powerful process of exchange 'between the human and the other-than-human'. The four parts of the volume reflect these different understandings of nature and performance. Informed by psychoanalysis and cultural materialism, contributors to the first part, 'Spectacle: Landscape and Subjectivity', look at ways in which particular social and scientific experiments, theatre and film productions and photography either reinforce or contest our ideas about nature and human-human or human-animal relations and identities. The second part, 'World: Hermeneutic Language and Social Ecology', investigates political protest, social practice art, acoustic ecology, dance theatre, family therapy and ritual in terms of social philosophy. Contributors to the third part, 'Environment: Immersiveness and Interactivity', explore architecture and sculpture, site-specific and mediated dance and paratheatre through radical theories of urban and virtual space

and time, or else phenomenological philosophy. The final part, 'Void: Death, Life and the Sublime', indicates the possibilities in dance, architecture and animal behaviour of a shift to an existential ontology in which nature has 'the capacity to perform itself'.
