"Christina Moore uses her talent for storytelling to create a more narrative-like tale. An attractive offering for listening centers and for young children interested in nature and science." -School Library Journal

### **Edward Hopper Paints His World**

This practical introduction includes all of the coverage of strength topics contained in this larger text. It's a step-by-step presentation that is so well suited to undergraduate engineering technology students. Coverage includes: belt friction, stress concentrations, Mohr's circle of stress, moment-area theorems, centroids by integration, and more.

### **Political Ideologies**

"Is my baby in heaven?" This is the most important question a grieving parent can ask. And even if the little one is someone else's child, the issue remains: What happens to children?those unborn, stillborn, or youngsters?when they die? Can you hope to see them again? Can you let go of your fear and guilt? Can God's love soothe a wound so jagged? With scriptural authority and the warmth of a pastor's heart, bestselling author John MacArthur examines the breadth of the entire Bible and reveals in this compelling book the Heavenly Father's care for every life. "I have sat by the grave of our daughter and son and wondered out loud if my belief that Hope and Gabriel are in heaven has any solid scriptural support. John MacArthur offers truth from God's Word that puts the doubts of any grieving parent to rest. Safe in the Arms of God reveals that confidence of heaven for the child you love is based on much more than mere sentimentality; it is revealed in the Word of God and reflective of the very heart of God." ?Nancy Guthrie, author of Holding On to Hope

## **Biological Methylation and Drug Design**

### **Body Bazaar**

This book was developed as a result of collaborative effort among primary care specialties and psychiatry to develop a useful approach for diagnosing mental disorders in primary care settings. It is intended to provide a framework tailored to educating primary care providers about mental disorders that is compatible with the standard approaches used in specialty mental health care (i.e. DSM\_IV). This primary care version should also help to improve communication among primary care providers, psychiatrists, and other mental health professionals and to promote educational, clinical, and research collaboration. -- from Introduction.

### **In Search of Lost Time**

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry,

pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methylations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

When Camilla's father is suddenly killed, she runs away from home, heartbroken and fearing that Hosea knows more than he's willing to admit. After years of hustling and scheming, Camilla returns back to Atlanta where a twisted turn of events lands her working a contract job with the one man she tried so hard to run from Hosea. Hosea's heart and loins shudder when he finds out that Camilla is back. Although he hates having to put in work with Camilla, he'd rather help her than risk her life. He sees the opportunity as his second chance to finally win over the only woman who has ever held his heart completely. That is, if never finds out what he knows about her dad's death. But with more dangers from the past threatening to consume them, find out if Hosea and Camilla can first survive the contract and eventually find their way back to each other.

Computer Science and Applied Mathematics: Algorithm-Structured Computer Arrays and Networks: Architectures and Processes for Images, Percepts, Models, Information examines the parallel-array, pipeline, and other network multi-computers. This book describes and explores arrays and networks, those built, being designed, or proposed. The problems of developing higher-level languages for systems and designing algorithm, program, data flow, and computer structure are also discussed. This text likewise describes several sequences of successively more general attempts to combine the power of arrays with the flexibility of networks into structures that reflect and embody the flow of information through their processors.
